SUPPLEMENT TO
REPORT NO.

1. A large military depot containing construction material and auxiliary machinery is located near the cement factory in Split. Since March 1950, large amounts of material such as cement, iron, lumber, tin, compressors, pounder, mixers, and wagonettes (sic), have been arriving at the depot and are subsequently transported to the sites of unstated construction jobs in the southern Adriatic.
2. The CRES and the PM-22, auxiliary vessels, transport material from this depot to the islands of Lastovo and Mijet, as well as the Peljesac Peninsula, on an average of once a week.
3. The Yugoslav Army has a large munitions depot near Gradsko, southern Serbia (see attached sketch). The depot comprises 10 barracks and houses various types of munitions, primarily artillery munitions. It is surrounded by heavy barbed wire entanglements and a guard unit of 24 men, supplied by an unnamed infantry regiment in Velos, is assisted by seven watch-dogs in carrying out its duties.
